Andy and Sarah,
Attached are the sub-slab vapor results taken at the Vermont Street homes impacted by vinyl chloride. There were several detections including PCE but no vinyl chloride.

Subject: Sub-slab vapor results

Attached are the validated results of the sub-slab vapor study conducted at the three residents with the treatment systems.
The fourth sample is an ambient air sample collected from the porch of 4012 Cossell road.
ATSDR will be receiving the data for review shortly. If you have any questions please feel free to contact me.

Thanks,
Brian
